Flavoring Extracts

OliveNation's flavoring extracts are the professional's choice for adding concentrated flavor and/or aroma to their creations. We offer a full selection of both water-soluble and oil-based extracts in a variety of fruit, vegetable, herbal, and specialty flavors spanning sweet, salty, sour, bitter, and umami taste profiles. Ideal for direct use in bakery, restaurant, and home cooking environments or in food and beverage manufacturing applications, OliveNation extracts feature alcohol or water-base formulations for optimal mixing. All of our culinary and brewing extracts come with clear ingredient labeling, easily available material information sheets, as well as TTB approval certification when applicable.

Natural, Plant-Based, & Organic Extracts

The majority of our extracts are created using all-natural flavors, many using Organic or Organic compliant ingredients. OliveNation flavorings are produced variously by cold-pressing, steam distillation, and chemical or traditional infusion in order to best reproduce true taste in an easy to use form factor. Our high-quality flavoring extracts from natural fruit, floral, herbal, and spice sources are invaluable components as many food industry businesses move toward using more natural ingredients and clean labeling practices. We also provide a full range of flavorings suitable for specialty dietary needs, including gluten free, Certified Kosher, and even sugar-free options.

Complex & Specialty Flavor Extracts

In addition to our natural and Organic flavoring extracts, OliveNation offers a large selection of specialty flavorings designed to delight the palate. These flavors bring together complex taste profiles in a single ingredient for a burst of flavor that can be familiar or unique depending on your final product. Want to create bacon-flavored frosting, fillings with the rich taste of Creme de Menthe but without the alcohol, or beverages and ice cream with the sweet, summery taste of cotton candy? All these flavors and more can be added to recipes and brews with ease using our specialty flavoring extracts for restaurants, food and beverage manufacturing, confectionery, and bakery applications.
